mountway®
bringing independence to life

bathing and toileting

Taking a bath can be one of life's great pleasures, leaving you fully refreshed and relaxed.

If getting in and out of the bath is taking more out of you than it should, the Neptune bath lift offers a simple, safe and great all-round solution.

At the touch of a button, Neptune will lower you safely to the bottom of a warm, calming bath and will then raise you effortlessly back to the top again.

Impressive legroom

Neptune's slimline, compact design enables it to be positioned at the very back of your bath to maximise leg space – ideal if you are tall or have a small bath. Combined with a seat that also goes low into the water, you can enjoy a great wash and a relaxing soak!

Stylish and comfortable

Neptune's sleek, modern style blends discreetly into any bathroom. Its high, contoured backrest offers increased comfort and support, along with freedom to move your arms when bathing.

Lightweight and compact

It is one of the lightest bath lifts available and can be easily split into 2 lighter sections for taking in and out of the bath. It curves neatly around your body for ease of carrying and fits into small corners for storage.

Fits virtually any bath

No complex or expensive adaptations required! Neptune is suitable for almost any style or shape of bath and attaches securely to your existing bath with 4 reassuringly large suction feet.

Safe and simple to use

Don't worry about electricity in your bathroom! Neptune is powered by a completely waterproof rechargeable battery hand control. This features large, easy-to-press buttons and a built-in monitoring system to indicate when recharging is needed*.

** Battery charger also supplied*

Easy to clean

Smooth, accessible surfaces and an open-based design make Neptune and the bath around it incredibly straightforward to clean.
